

PPG Aerospace
Cuming Microwave

Certificate of RoHS Conformance

RoHS 2 (2011/65/EU) and RoHS 3 (2015/863)

16 January 2019

Dear Valued Customer,

We appreciate your interest in PPG products and are responding to your request for information on the RoHS status of our PPG Aerospace Cuming Microwave family of products.

The EU Directive 2011/65/EU "Restriction on the Use of Certain Hazardous Substances" (RoHS) requires all Member States (per Article 4(1) of the Directive) to ensure that materials and components of electrical and electronic equipment put on the market after 1 July 2006 do not contain the following specific hazardous substances: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBBs) or polybrominated diphenyl ethers (PBDEs).

The amendment (EU Directive 2015/863) includes four additional phthalates as part of the restricted chemicals list: Bis(2-ethylhexyl) phthalate (DEHP), Benzyl butyl phthalate (BBP), Dibutyl phthalate (DBP), and Diisobutyl phthalate (DIBP).

Our products have been reviewed with regard to the EU Directives 2011/65/EU and 2015/863. Based on our current knowledge and the information (such as safety data sheets [SDSs]) provided to PPG by its raw material suppliers, **we certify that our products entering the EU market do not contain** any of the restricted chemicals at levels greater than the tolerated maximum concentration values.

Please do not hesitate to contact me if you have additional questions regarding our products.

Sincerely,

Andrew Dalton, CSP, CET, CHMM
